DOANE COLLEGE

GOODWIN D. SWEZEY, A. M., Natural Science.

Crete, Neb. May 10. 1882

Dr. Engelmann,

Dear Sir:-

Some time ago Dr. Gray expressed his doubts as to whether Pinus mitis grew as far north as Wisconsin. It was originally reported from the state I suppose by Dr. Lapham, but he afterwards changed his mind about it. I suppose, at least he relabelled his specimens resinosa. In revising a list of Wisconsin plants I am in doubt whether to include P. mitis, but you can doubtless advise me,

Very truly yours,

Goodwin D. Swezey
